

ORPHEUS ETHICS IN SCIENCE MODULE

at DIBSS / Dubrovnik International Bioethics Summer School

From the June 19th to the June 25th 2017 Dubrovnik International Bioethics Summer School – DIBSS will take place. Part of the school will be **ORPHEUS Ethics in Science Module**.

Directors of the module are: Ana Borovečki (MD, PhD) and Zdravko Lacković (MD, PhD)

The notion of science ethics is closely related to the problem of responsible conduct of research (RCR). This area covers a series of questions ranging from the conflict of interest, authorship, cooperation in science all the way through different forms of fraud and research data manipulation, as well as questions concerning adequate approach to data acquisition and processing. Ethics in science applies to all types of scientific research ranging from those using bioinformatics methods and different experimental theoretical models to those involving animals and people.

The module will cover topics connected to the ethics of science through different examples and research data. Special emphasis will be placed on practical approach to teaching ethics in science.

Topics:

1. Ethics and Scientific Research
2. Scientific Misconduct
3. Publication Ethics Issues
4. Practice Examples- How to Teach Ethics in Science
5. Round table discussion: Can we create a pledge like Hippocratic Oath for ethics in science for young researchers?

Lecturers: 1) Zdravko Lacković, MD, PhD, School of Medicine, University of Zagreb, President ex-officio, ORPHEUS executive committee member

2) Ana Borovečki, MD, PhD, School of Medicine, University of Zagreb, ORPHEUS treasurer.

We are looking forward to seeing you in Dubrovnik.
