

How to teach ethics of science to PhD students

Ana Borovecki, University of Zagreb, School of medicine

Teaching research ethics

- The research misconduct cases became very prominent issue in the public arena in recent years.
- The importance of research integrity was highlighted by the Global Research Council and by the EU within the framework of Horizon 2020 projects.
- There is a need for creating a practical toolkit for people teaching future PhD students in biomedicine and healthcare sciences and for PhD students themselves.

Teaching research ethics

- Part of PhD training
- Small group discussions
- Journal clubs
- Interactive tutorials
